DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks, filed 7/26/2005, with respect to the rejection(s) of claim(s) 1, 2 and 4 under 35 USC102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Harkham.

Drawings

2. The drawings were received on 7/26/05. These drawings are approved.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Harkham.

As to claims 1 and 4, Harkham discloses a system for generating an alert in a video surveillance unit, the system comprising: access means for accessing sequences of digital images (page11 paragraph 0077);
pattern recognition means for recognizing an entity in at least one digital image from

Art Unit: 2625

the sequences of digital images (page11 paragraph 0077);

rule application means for applying rules relating to entities potentially appearing in the at least one digital image, the rules pertaining to at least one entity; and means for generating the alert responsive to the at least one digital image satisfying one or more of the rules (see above).

As to claim 2, Harkham discloses the rules include a rule specifying the generation of the alert when the entity in the at least one digital image is recognized by the pattern recognition means as corresponding to a tracked entity (paragraph 0077).

Allowable Subject Matter

5. Claims 3, 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 9-19 are indicated allowable.
